INTERNSHIPS

Full Stack Development
BWS, Virtual
Oct 2022 - Dec 2022

During my 2-month online internship at BWS, I excelled as a full-stack web developer. Taking on front-end and back-end responsibilities, I successfully completed 2 main projects and 5 mini projects. This invaluable experience at BWS is amazing 🤩

POSITIONS OF RESPONSIBILITY

Working as a intern at Way2agribusiness India pvt ltd, Bangalore

TRAININGS

Python
Hakerrank, Online
Jul 2022 - Sep 2022

I spent my 2 months of my time in learning Python from W3schools, YouTube then I practice those skills in HackerRank by solving problems.

JavaScript
skillup, Online
Apr 2022 - May 2022

This course enhanced my skills with clean and effective presentations. The interactive approach, using animations and examples, facilitated real-time practice, making it highly beneficial for skill development.

PROJECTS

Attendance management system website using Django

May 2023 - May 2023

http://prashanth01.pythonanywhere.com/

🎉This website is designed for teachers. It enables them to effortlessly add new students, record attendance, and generate reports for various time periods. Additionally, teachers can conveniently update (IA) marks for accurate academic records.

Human emotion detection using python

Apr 2023 - Apr 2023

https://github.com/Prashanthg01/Emotion_Detection_Using_Python

🎉The project utilizes libraries such as OpenCV, TensorFlow, NumPy, winsound, and Twilio to accurately identify emotions like happiness, sadness, anger, disgust, and normal state. It enables efficient recognition of human emotions.

Basic E commerce website using Django

Mar 2023 - Mar 2023

https://way2agribusiness.pythonanywhere.com/

🎉This is a dynamic platform with live weather updates via OpenWeatherMap API. It offers a comprehensive admin panel for effortless product management, including adding, deleting, and editing items. Additionally, user can compare products.

Secured and Transparent voting system using Biometric Fingerprint(IoT)

Jun 2022 - Aug 2022

🎉This is an innovative project that combines advanced biometric technology with the Internet of Things (IoT) to create a secure and transparent voting system. It ensures accurate voter identification through fingerprint authentication.
